

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

Applicant: Tohru KIKUCHI

Title: TRANSMISSION DIRECTIONAL ANTENNA CONTROL SYSTEM,
BASE STATION, AND TRANSMISSION DIRECTIONAL
ANTENNA CONTROL METHOD USED FOR SYSTEM AND
BASE STATION

Appl. No.: Unassigned

International Filing Date: 01/18/2005
371(c) Date: 07/20/2006

Examiner: Unassigned

Art Unit: Unassigned

INFORMATION DISCLOSURE STATEMENT
UNDER 37 CFR §1.56

Mail Stop Amendment
Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Sir:

Submitted herewith on Form PTO/SB/08 is a listing of documents known to Applicant in order to comply with Applicant's duty of disclosure pursuant to 37 CFR §1.56.

A copy of each non-U.S. patent document and each non-patent document is being submitted to comply with the provisions of 37 CFR §1.97 and §1.98.

The submission of any document herewith, which is not a statutory bar, is not intended as an admission that such document constitutes prior art against the claims of the present application or that such document is considered material to patentability as defined in 37 CFR §1.56(b). Applicant does not waive any rights to take any action which would be appropriate to antedate or otherwise remove as a competent reference any document which is determined to be a *prima facie* art reference against the claims of the present application.

TIMING OF THE DISCLOSURE

The listed documents are being submitted in compliance with 37 CFR §1.97(b), within three (3) months of the date of entry of the national stage as set forth in 37 CFR §1.491.

RELEVANCE OF EACH DOCUMENT

Documents A1 and A2 are U.S. counterparts of Document A13, which relates to radio communications equipment using adaptive array antenna to reduce the transmission electric power of a base station and to increase the number of simultaneous terminal connections.

Document A3 is a U.S. counterpart of Document A8.

The relevance of Document A11 is described in the present application.

Document A4 is a U.S. counterpart of Document A10, which relates to a transmission antenna directivity control device and method therefore, which can improve the transmission direction precision of a transmitted beam with a simple structure..

Document A5 is a U.S. counterpart of Document A14, which relates to a multi-beam antenna system for radio base station to perform transmission beam forming when incoming signals are present and to stop the transmission beam forming when the incoming signals are not present.

Document A6 is a U.S. counterpart of Document A12, which relates to radio communications equipment using adaptive array antenna, which reduces the transmission electric power of a base station and increases the number of simultaneous terminal connections by calculating the subspaces of respective terminals and buses.

Document A9 relates to a device and method for radio communication which prevents the diversity effect of a diversity system, generally applied to a down line of a CDMA radio

communication system, from becoming worse and to prevent transmitting electric power from being dissipated.

Documents A7, A8, A12 and A15, listed on the attached PTO/SB/08, were cited as being relevant during the prosecution of the corresponding International application. A copy of the International Search Report is attached setting forth the portion of each document considered relevant by the examiner. An English-language counterpart of the foreign-language documents has been provided.

Applicant respectfully requests that each listed document be considered by the Examiner and be made of record in the present application and that an initialed copy of Form PTO/SB/08 be returned in accordance with MPEP §609.

Although Applicant believes that no fee is required for this Request, the Commissioner is hereby authorized to charge any additional fees which may be required for this Request to Deposit Account No. 19-0741.

Respectfully submitted,

Date: July 20, 2006
